Panama City, Fla. – The Florida Department of Health in Bay County (DOH-Bay) conducts saltwater beach water quality monitoring in accordance with the Healthy Beaches Monitoring Program. New funding now allows **weekly water sampling between March and October**. The samples are checked for **enteric bacteria** that normally inhabit the intestinal tract of humans and animals. The presence of enteric bacteria **can be an indication of fecal pollution**, which may come from storm water runoff, pets and wildlife, and human sewage. **Poor results** are posted as an **“Advisory”** at the affected beaches.

An advisory is issued for PCB City Pier (SP 3) located at 16201 Front Beach Road #D, Panama City Beach and Delwood Beach (SP 8) at the end of Jan Cooley Drive in Upper Grand Lagoon. There are **no additional advisories** for any of the Bay County Healthy Beaches sampling sites.

Healthy Beaches advisories are issued **to protect swimmers from increased risk of gastrointestinal illnesses**. At a **lower occurring level**, there may also be increased risks of **upper respiratory infections, skin rashes, and ear infections**. Healthy Beach advisories are **not related to Necrotizing fasciitis**, a rare complication.

DOH-Bay **tests six sites** along the Gulf of Mexico from Laguna Beach to Panama City Beach access #1. There are **four locations along St. Andrews Bay** including; Delwood Beach, Carl Grey Park, Beach Drive, and Dupont Bridge. **Sampling** is done on **Mondays** with **results** on **Tuesday**, with exception of holidays. Results are shared at Bay.FloridaHealth.gov, through media releases, and **real-time** on the Florida Healthy Beaches page at FloridaHealth.gov and search for **“Healthy Beaches”**.

Florida Healthy Beaches Program Categories are; Good = 0-35 Enterococci per 100 milliliters of marine water, Moderate = 36-70 Enterococci per 100 milliliters of marine water, and **Poor = 71** or greater Enterococci per 100 milliliters of marine water. If **levels** are **above 70**, **Bay CHD notifies** the local **Florida Department of Environmental Protection** for further investigation.

If you have any questions, please contact the Bay County Health Department at 850-481-4806 or visit the Department of Health's Internet Beach Water Quality website at <http://www.floridahealth.gov/healthy-environments/beach-water-quality/index.html>.

About the Florida Department of Health

The department, nationally accredited by the [Public Health Accreditation Board](#), works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.
